

Green Entre  
4Future

Co-funded by the  
Erasmus+ Programme  
of the European Union

# PROJECT OVERVIEW

## GREEN ENTRE 4 FUTURE

DATE 14/02/2023

Edition #1

### Dear reader,

GreenEnter4Future is an international project co-financed by the European Commission under the Erasmus+ Programme.

The project is implemented and developed by four organisations from four countries (**Cyprus, Portugal, Italy and France**) sharing the ultimate aim to generate educational value and **green employment horizons** for long-term capacity building and **empowerment for environmental change**, support investments and **related growth**.

This project is addressed at strengthening and validating competences of **youth, future start-uppers, young entrepreneurs, NEET** (Not in Employment, Education or Training), **youth workers**, but also **trainers, experts, educators, staff, stakeholders** (policymakers, green businesses, consumers), combining two of the most important challenges in 21st century:

- Involve and **activate youth in solving environmental issues**;
- **Empower youth workers** to help counter the dramatic increase of unemployment among young people.

### GE4F OBJECTIVES

- Define **sustainable development approaches**, by providing a training panorama for **green business, circularity** and employment opportunities;
- Develop and share tools to empower youth with **digital skills applied in green economy** and development of **youth entrepreneurial spirit**;

- Train youth workers to develop their professional competencies and to provide youth, **eco-friendly start-ups** with **specific knowledge in fast tracking green economy, reducing environmental risks** and promote social equity;
- **Promote European climate legislation**, for a cleaner energy generation;
- Create synergy among stakeholders to **restore youth's financial health** and build **eco-friendly initiatives**.

## GE4F RESULTS

The objectives set of the project will be reached through these intellectual outputs:

1. **Toolkit - “Be the Climate Change Ambassador”**, with the purpose to show the set of approaches and methodologies to be used in Europe to empower youth for climate fight. It will include a **Green Online Game** to mobilise youth to fight the climate crisis and for youth workers on how to intercept, involve, activate and train youth, to develop **green skills, green employment**, start a **green business ideas** and **anticipate changes in workplaces of the future**.

The **interactive content of the toolkit** will provide a comprehensive educational panorama with **practical digital tools** for green entrepreneurship education; introduce youth in a fun way to European policies about environmental issues and develop entrepreneurial ideas.

2. **MOOC (Massive Open Online Course) - “Build your Green Future”, for youth workers/experts/educators**. An e-learning tool to lead youth in green markets, to seize job opportunities and create **synergies in the green sector**. It will:
  - Empower youth workers to deliver **innovative training** and practical education for youth's future career opportunities;
  - Establish youth workers' practices on how to develop **sustainable business models** and to **successfully enter the job market**;
  - Make use of **key skills applied to green economy**;
  - **Provide guidelines** through existing assessment/certification to increase their employability via non-formal and informal learning.

The project activities are **multidimensional** and important for creating smart, **sustainable and inclusive growth**. They will introduce practical innovations in the green economy sector, like **start-ups in sustainable tourism, cultural and creative industries and urban revitalisation based on heritage**, all of them **important economic sub-sectors capable of generating employment, stimulating local development** and promoting creativity.

It's a sustainable development of approaches for green business, circularity and employment.

**All project outputs are flexible and easily adaptable to be transferred to other sectors and to other EU countries.**

The consortium of this project is composed by:

- Cross Culture International Foundation Cyprus, Pafos (Cyprus) – parceiro Coordenador
- Infinitivity Design Labs, Laussone (France)
- Petit Pas, Trani (Italy)
- União das Freguesias de Gondomar (S. Cosme), Valbom e Jovim (Portugal)
- Lidi Smart Solutions, The Hague, (Holanda)
