GREEN ENTRE 4 FUTURE Platform And Short training event in The Hague

GREEN ENTRE 4 FUTURE

DATE 15/06/2023

Edition #3

Dear reader,

□ **Join the Green Movement: Be the Climate Change Ambassador!** □

We're thrilled to share the latest achievements of the Green Entre 4 Future project, marking significant progress as of June 15, 2023. Our collaborative efforts are actively addressing key challenges of the 21st century by engaging young people in environmental problem-solving and empowering youth workers to tackle the growing youth unemployment crisis.

Project Overview: GreenEnter4Future is dedicated to training young individuals and youth workers, defining sustainable development approaches, and creating tools that empower young people. We're passionate about promoting initiatives supporting European climate legislation and fostering synergies among stakeholders.

Current Stage Project Highlights:

- We've developed a tailored MOOC to guide youth into the green market, opening doors for jobs, collaboration, and entrepreneurship within the green sector.
- An E-learning platform has been crafted for easy and comfortable access to our training program.

- Our project aims to empower a diverse group, including youth, aspiring entrepreneurs, NEETs, youth workers, trainers, experts, educators, staff, and stakeholders.

LTTA Short Training Event Recap:

- Hosted by Lidi Smart Solutions at The Hague Tech Building over three days, our event showcased “Be the Climate Change Ambassador – Green Toolkit” as well as the “Build Your Green Future” MOOC and the E-learning platform.
- Young people and youth workers from France, Italy, Cyprus, Portugal and The Netherlands took part in the training event.
- Pilot testing and daily Q&A sessions ensured participant engagement and clarity.

Post-Event Actions:

- Participants received certificates confirming their attendance at "Green Your Future - a short-term training" under the "Green Entre 4 Future" Erasmus project.
- Constructive feedback collected through a Google Forms questionnaire helped us to fine-tune the project.

Platform Release and Multilingual Accessibility:

- Our platform is live, offering the MOOC in English language, a testament to our collaborative international effort.

Next Steps:

- We're currently translating the MOOC and platform into five European languages (Italian, Greek, Portuguese, French, and Dutch) and developing strategic plans for wide dissemination.
